What's new in Viso 12?

Software based licensing fully integrated in Viso

You can activate or deactive your software license from the Viso application directly.

Highlight videos

In the Annotation module, you can now create highlight videos which summarise the most interesting point events of your sessions to be used e.g. in presentations or lectures. To these highlight videos, you may add your markers and remarks as subtitles.

The right to manage recording options moved to Technicians

Those with a Technician account can now enable multiple location recording, including composite and separate sessions.

Allocate groups to departments

When creating groups, now the department where the group belongs can also be provided.

Data Transparency Policy

When a new user logs in, a pop-up window will appear, informing the user about Noldus's Data Transparency Policy.
